### PARASITES

CRYPTOSPORIDIUM	NEGATIVE		Tech:ZB Date:02/09/18 14:23
ENTAMOEBIA HISTOLYTICA	NEGATIVE		NEGATIVE
GIARDIA	NEGATIVE		NEGATIVE
INTERPRETATION	*		

The xTAG Gastrointestinal Pathogen Panel (GPP) is an FDA approved multiplexed nucleic acid test intended for the simultaneous qualitative detection of multiple viral, parasitic, and bacterial targets in human stool specimens from individuals with signs and symptoms of infectious colitis or gastroenteritis.

Negative results do not rule out the possibility of infection. Results should be interpreted in conjunction with other relevant tests and the patient's clinical profile. If you have any questions, please contact the Molecular Diagnostics Laboratory at Lincoln Diagnostics, LLC.

xTAG GPP is not intended to monitor or guide treatment for C. difficile infection.
